

TEAM BUILDING

Be careful as you do not know who is lurking around the corner!

Become a part of the unknown history of Krakow that will guide you through its secrets and mysteries. The city seen from the perspective of legends, old intrigues, unwavering love and the battle between good and evil – will unbosom itself to you. Codes and riddles, lost items, surprising disguised stuntmen, hiding spots, secret places, monuments and old walls – you like it, don't you?

The game for:

- foreigners and guests from other cities who want to get to know Krakow in a non-standard manner
- lovers of Krakow wishing to become close friends with the city
- companies who find it important to combine good fun with team building and logical tasks

Challenge:

Divided into groups, you walk through the city jungle. On your way, like the characters of games and films, you find clues, meet mysterious figures, follow traces, decipher Latin inscriptions and first and foremost come closer to solving the intrigue against the Krakow legends.

Logistics:

- as part of the game, depending on the time variant, the participants have the possibility to visit a few places (tickets included)
- the game is conducted on foot, with no possibility to use the means of transport
- the weather should be moderate (we do not recommend the game between November and March)

Advantages:

- the opportunity to show your creativity, knowledge and intellect
- improving your wits, reflex and observation
- learning orienteering
- observing and drawing conclusions
- activating logical thinking
- good fun and integration

Variants / Extensions:

- the highlight of the game will be a feast or dinner in one of the restaurants connected with the history of Krakow
- the game can be accompanied by a training session in team management, including an extended feedback session after experiences in the field

The game through the eyes of the participants:

"I've never thought I have some qualities of a leader. The city game around Krakow has helped me discover them. A valuable experience and good fun!"

"We had to organise ourselves well to solve all the tasks. It made me think."

Whoever wants to look into the soul of Poland, let him look in Krakow.
